Community Network

Supporting you to find the answers

Our offer in Liverpool

Through our community-based groups, programmes, and opportunities that raise awareness; develop skills; share learning experiences; and build confidence, we support children, young people, and families living with neurodevelopmental conditions, learning difficulties and associated mental health needs.

Open Access Community Network Groups

If you have concerns about your child's behaviour or progress at school, our community network groups offer support to help you learn, understand and meet the needs of your child and family.

Family Learning Programmes and Workshops

Structured programmes and workshops that give parents, carers, and supporters the skills, knowledge and confidence to enable you to better recognise, understand and meet the needs of your family living with neurodevelopmental conditions, learning difficulties and associated mental health needs.

Family Activity Days

Join us and other families on our family activity days. Taking place during school holidays they include trips to the park, fun days, walks with the ranger, cookery activity days and days out.

Supporting children & young people

For children and young people with a neurodevelopment condition finding it difficult to engage in activities, our learning workshops, groups and activities will help them overcome these challenges and learn how to manage individual situations.

Awareness Raising Training for Professionals

Designed to improve professionals' understanding of neurodevelopmental conditions, how they may present and how one condition may overlap with another. Professionals attending this training will develop knowledge, skills and confidence to better support families living with neurodevelopmental conditions and learning difficulties.
